

WASTE CONTAINER MAINTENANCE WORKER*Class Definition*

Under supervision, performs semi-skilled work in the maintenance of waste containers; operates various power equipment including a forklift, grinders, welders, and hydraulic jack.

Distinguishing Characteristics

The Waste Container Maintenance Worker class is assigned to the Solid Waste Management Division of Public Works. The incumbent performs semi-skilled work in the repair and maintenance of the containers, including cleaning, welding, and painting of the containers. This class is distinguished from the Waste Collector series in that incumbents of the latter are primarily concerned with refuse collection on assigned routes. It is distinguished from the Combination Welder II class in that incumbents of the latter are responsible for product fabrication and a variety of other skilled tasks.
